WORK EXPERIENCE

Application Developer Intern, T.C.C. Technology Co., Ltd. — November 2025 - Present
Bangkok, Thailand

- Contributed to the backend of a randomized product selection feature by implementing user time tracking logic and resolving defects identified during QA testing.
- Fixed SQL Injection, IDOR issues, transaction leaks, and implemented input validation to prevent negative values.
- Refactored code structure by migrating logging to zerolog, removing unnecessary logs.
- Updated database events and views, improved API responses, and prepared JSON data from the database for testing purposes.

Developer (Freelance) , Mordin Project, Mitr Phol Innovation & April 2025 - January 2026
Research Center

- Responsible for developing a comprehensive internal web application using React, enabling administrators to manage soil sample data and complex laboratory results.
- Developed a public-facing website for farmers using PHP Flight to deliver personalized agricultural data and recommendations.
- Implemented a RESTful API with NestJS to handle all system data, from user accounts to scientific analysis results.

Application Developer Intern , Wealth Management System April 2025 - May 2025
Limited — Bangkok, Thailand

- Developed C# functions to convert SQL queries between MSSQL and DB2, using the Composite Pattern to handle nested-IF conditions.
 - Built and maintained backend services using C#, handling API endpoints and business logic.
 - Designed and implemented dynamic web components using Angular, integrating frontend pages with backend APIs.
 - Collaborated on developing user interfaces with dynamic components and several web pages to enhance user experience.
-
